

TRICAL® Forage Triticale

Evaluation of Triticale Forage for Milk Production Dairy Feeding Trial Ohio State University 1994-95

	<u>TRICAL® Triticale</u>	<u>Corn Silage & Alfalfa</u>
<u>Dry Matter Intake</u>		
Pounds / day	45.9	50.3
<u>Milk Production</u>		
Pounds / day	64.2	65.1
Fat (%)	3.3	3.3
Protein (%)	3.2	3.2

TRICAL® triticale had a relative economic value of \$109 per ton of dry matter when fed in place of corn silage and alfalfa, compared to \$120 per ton for alfalfa and \$63 per ton for corn silage given the ingredient prices used in this study.
